

CRPT Connector — successful extension for SAP ATTP is now available in SAP Store for clients all over the world

3Keys GmbH has successfully completed its own solution CRPT Connector certification and is now an SAP trusted partner. The CRPT Connector is available in the official SAP marketplace – [SAP Store](#), as the first certified extension for SAP ATT (ATTP).

The CRPT Connector is a solution provided by 3KEYS GmbH. The CRPT Connector helps companies to fulfill the reporting requirements to the Russian Federal Databases for Medications, Tobacco, Footwear, Tires, Light industry products, Dairy and also for upcoming regulations, such as Water, Beer, and other goods. The CRPT Connector allows full automation of the reporting to the Russian Federal Databases and provides comfortable monitoring capabilities to the user. This helps to reduce the number of mistakes and the working time needed to ensure compliance with Russian Legislation. The CRPT Connector enables bi-directional (inbound and outbound) integration between SAP ATT (ATTP) and the GIS MT, IS MDLP, IS MOTP systems. Among the enterprises that have already implemented the solution are already 14 global companies from the automotive, pharmaceutical, and food industries. The SAP certificate is another proof of the reliability, convenience, and security of the solution.

More than 440,000 clients use SAP solutions and services all over the world and more than 22 thousand internet users every month visit the SAP Store looking for applications and extensions for enterprise system improvement.

"The main idea of certification is checking the code quality and interoperability with SAP ATT solutions. Passing the certification procedure once again showing the high reliability of the solution, compliance with all quality standards required by SAP," **noted Pavel Kanskov, Co-founder & CTO of 3Keys GmbH.**

"Helping customers to be compliant with Track & Trace requirements is the main task of 3Keys GmbH. At the stage when the Russian regulator has been preparing the methodology, we were

able to accurately define the need of our customers. The need for a product that, on the one hand, technically copes with all the complexity of integration with the regulator's systems and, on the other hand, will provide automation of the reporting processes. The CRPT Connector's development started in the middle of 2018, and the first version went into product use already at the end of 2019. Today, The CRPT Connector is an integral part of the system landscape of 3Keys customers," **adds Stepan Lialine, Co-founder & Managing Director of 3Keys GmbH.**

About:

CRPT Connector is patented by 3Keys GmbH solution. CRPT Connector is the combination of an ABAP SAP ATT add-on and a Java-based middleware used to transfer digitally signed reporting messages from SAP Advanced Track & Trace (SAP ATT) to the Russian CRPT system using a secure connection. Moreover, it downloads incoming messages from CRPT and forwards them to SAP ATTP / ATT for further processing and provides the monitoring for outbound and inbound messages. The CRPT Connector is available both on-premise and as a cloud version.
